Race propositions

General individual time classification in the U23 category - White jersey

The winner of this competition becomes a rider born between 2000 and 2003 with the best final individual placing.

The leader of this competition wins the White jersey and is obliged to wear it at the race.

Team classification

The evaluation of the team classification in a stage is done according to the sum of the individual finishing times of the best 3 riders in each team. If more teams have equal times, the final ranking is done according to:

- better finishing places of the first three riders in the stage
- the finishing place of the team's best rider.

The overall team evaluation is done according to the sum of individual finishing times of the first three team riders that were achieved in all stages. If it is still impossible to differentiate the teams, then a higher number of 1st places in a day team classification decides, higher number of 2nd places in a day team classification etc., finally then placing of the best rider in total individual ranking.

If a team is axed to less than three riders, it is excluded from the team competition.

Jersey wearing priority

In case that a rider becomes the leader in more competitions the jersey gets the rider who finishes on the 2nd place or next places in the competition.

The jerseys priority is the following:

- 1st - Yellow
- 2nd - Green
- 3rd - Polka Dot
- 4th - White
